77 West Jackson Blvd.
Chicago, IL 60604-3590

Dear Ms. Hyde:

This letter serves as confirmation that Archer Daniels Midland's CCS#1 permit application relies upon the computational modeling performed for delineation of the Area of Review and developing the Post Injection and Site Closure (PISC) Alternative Timeframe to satisfy the requirements of 40 CFR 146.93(c). ADM requests that the PISC Alternative Timeframe demonstration submitted in conjunction with the CCS#2 well permit number IL-115-6A-0001 also be considered when evaluating the CCS#1 permit application and developing the Class VI permit for that well.

If you have questions please contact me at 217-451-5142.

Regards,

A handwritten signature in cursive script, appearing to read "Scott McDonald".
